

Game Setup

- 4-8 deck shoe.
- Dealer stands on soft 17 (S17).
- Bets placed before any cards are dealt — two cards to each player, two to the dealer (one up, one down).

Payouts

Outcome	Payout
Regular win	1:1
Blackjack (natural 21)	3:2
Push (tie)	Bet returned
Insurance (side bet)	2:1

Player Actions

Hit / Stand

- Take another card or take no more cards.

Double Down

- Allowed on any first two cards.
- Only before any other action — no doubling after a hit.
- Double After Split (DAS) allowed.

Split

- Allowed on any matching pair.
- Re-splitting allowed, up to a maximum of 4 hands.
- Split Aces: one card per Ace only, no further hitting.
- Re-splitting Aces allowed.

Insurance

- Offered only when dealer shows an Ace.
- Side bet up to half original wager, pays 2:1 if dealer has blackjack.

Surrender

- Late surrender allowed (only on the original two cards, before any other action, after dealer checks for blackjack. Forfeits half the original bet).

Variability at Real Tables

- Blackjack payout: 3:2 is standard here; some casinos pay 6:5 instead.
- Dealer soft 17: some tables have the dealer hit soft 17 instead of stand.
- Doubling: some tables restrict doubling to specific totals (e.g. 9-11 only) rather than any first two cards.
- Surrender: not all casinos offer it; where offered, late surrender is far more common than early surrender.
- Re-splitting limits and rules for split Aces vary by casino — some don't allow re-splitting Aces, or don't allow hitting after splitting Aces at all.
- Number of decks: commonly 1-8; fewer decks usually come paired with other rules that favour the house more (e.g. 6:5 payouts).
